Malarial fever..	2		

HAVANA, CUBA, *December 23, 1900.*

SIR: I have the honor to submit the following report for the week ended December 22, 1900:

Two deaths from yellow fever are reported for the week.

Passenger travel between the United States and Cuba is at present very heavy, and as baggage for all of the gulf ports is still being disinfected the work at this station is fully as active as during the summer season.

Two vessels with jerked beef arrived during the week from the Argentine Republic and were disinfected and allowed to discharge in quarantine. In the hold of one, the *Alfredo*, a number of dead rats were found after disinfection so a special guard has been placed on board to carefully examine the cargo as it goes into lighters and to prevent the dead bodies of rats from being ferried ashore.

The Quartermaster's Department is now being returned to the former quarters at the Palacio Segundo de Cabo. On account of the number of yellow fever cases taken from this building the entire office force was removed to Principe and the clerks held in quarantine. The building has been thoroughly disinfected by the city sanitary authorities and newly painted, so that reoccupation is now considered safe.

A case, suspicious of yellow fever, was taken off the steamship *Mexico*, just before sailing, on Saturday the 22d, and sent to the hospital.

The usual mortality report is inclosed.

Respectfully,

A. H. GLENNAN,

Surgeon, U. S. M. H. S.,

Chief Quarantine Officer for the Island of Cuba.

The SURGEON-GENERAL,

U. S. Marine-Hospital Service.

[Inclosure.]
